EDUCATION

McGill University

Ph.D. Candidate in Mechanical Engineering

Montreal, CA

Jan. 2022 – Present

Master of Science in Mechanical Engineering; Fast-track; CGPA: 4.0/4.0

Sep. 2020 – Dec. 2021

- *Research Interests:* Biomechanics, System Modeling, Mechanical Design
- *Thesis:* Biomechanical design and validation of a benchtop robotic spine with applications in chronic low back pain research

Manipal University

Bachelor of Technology in Mechanical Engineering; CGPA: 9.17/10.0

Manipal, IN

Aug. 2016 – May 2020

- *Specialization:* Mechanical Design
- *Thesis:* 3D-Printing of Self-Healing Soft Robots at *Vrije Universiteit Brussel, Belgium.*

EXPERIENCE

Musculoskeletal Biomechanics Research Lab, McGill University

Montreal, CA

PhD Candidate

Sep. 2020 – Present

- **3D Printable Spine Phantoms:** Developed and open-sourced the first-ever fully 3D printable lumbar spine biomechanical phantom in literature, currently being used by an industry partner to validate their technology.
- **Hi-Fi Digital Twins:** Developed and validated fast-solving models of the human torso including the spine, the pelvis, the abdominal cavity, the ribcage and various muscle groups. These models are then used to train RL agents to predict muscle recruitment patterns under various loading scenarios.
- **Robotic Spine:** Developed a benchtop robotic spine model with focus on replicating human-like torso and spine kinematics and kinetics. Also developed the control logic and a GUI to manipulate the robot. Experienced in MATLAB, LABVIEW, sensors integration, real-time testing and tuning.

SURE Award Research Assistant

May 2019 - Aug 2019

- Pneumatic Artificial Muscle modeling and integration on the robotic spine with muscle pressure control in MATLAB and LABVIEW for stabilization

Department of Mechanical Engineering, McGill University

Montreal, CA

Course Lecturer - MECH 561: Biomechanics of Musculoskeletal Systems - 3 credits

Jan 2024 – present

Teaching Assistant - MECH 262, 290, 360, BIEN 500

Sept 2020 – Present

Vice President of Academics, Graduate Student Association (GAMES)

June 2022 - June 2023

SimCare

Montreal, CA

Biomedical Engineer (part-time)

Aug. 2024 – present

- Design and develop custom biomechanical phantoms replicating human anatomy as part of a lab spinoff. Collaborate with industry partners to deliver patient-specific, spine-related solutions tailored to their needs.

Foodlabs Inc. [stealth]

Bangalore, IN

Chief Technical Officer, Mechanical Engineer

Jul. 2020 – Sep. 2024

- Led a team of engineers to develop a software platform for user-centric food order customization. Designed robotic systems and a hardware ecosystem for "automated kitchen" deployment.

R&MM Research Group, Vrije Universiteit Brussel

Brussels, BE

Research Assistant

Dec 2019 – Apr 2020

- Designed and prototyped a custom print head for 3D printing temperature-sensitive polymers, enabling the development of self-healing soft robotic grippers, including a hybrid gripper capable of withstanding cuts from sharp payloads like knives.

PROJECTS

SpineSim Validation | *MDsim*

Aug 2024 – Present

- Built patient-specific spine biomechanical phantoms and analyzed its performance pre- and post- L3-L4 spinal fusion surgery.
- Generate validation data for SpineSim, a digital twin platform with applications in spinal surgery planning.

International Spine Biomechanics Consortium | *Sawbones Inc.*

Jan 2022 – Present

- Formed an international consortium of biomechanics labs focused on spine testing, performing multi-lab, multi-protocol testing on spine surrogates to establish a standard in spine testing.
- Collaborated with 7 participating labs and presented the results at international conferences like ORS and ISTA.

McGill - Wake Forest Collaboration | *Brown Lab*

Oct 2023 – Present

- Formed a collaboration with Dr. Philip Brown and Emma Coltoff at Wakeforest University to perform full-field, multi-specimen, multi-lab, multi-protocol spine surrogate testing.
- The research provides an understanding of the biomechanics of spine phantoms under multi-planar loading scenarios commonly seen in daily activities.
- Partly funded by the **ORS 2024 Travel Grant**.

Mars Rover Manipal

Dec 2016 – May 2019

- Led a team of 4 as Research Lead (2019) on robotic exploration projects, including an autonomous bicycle and underactuated robotic gripper.
- Developed a Mars Rover prototype with autonomous navigation, equipment servicing, and astronaut assistance capabilities.
- Ranked 1st place globally at the Indian Rover Challenge (IRC 2017) and 7th place worldwide at the University Rover Challenge (URC 2018, Utah, USA).

Crawler Bot | *Perma-Liner*

May 2019 – Aug 2019

- Led a team of 12 to develop a crawler bot for pipeline exploration and repair, featuring a novel snake-inspired drive system for navigating tight bends.

AWARDS & ACHIEVEMENTS

- GREAT Travel Award 2024, McGill University, Montreal, CA.
- Fonds de recherche du Québec–Nature et Technologies (FRQNT) Doctoral Research Scholarship 2024, Montreal, CA.
- GREAT Travel Award 2022, McGill University, Montreal, CA.
- Fonds de recherche du Québec–Nature et Technologies (FRQNT) Masters Research Scholarship 2022, Montreal, CA.
- McGill Engineering Doctoral Award (MEDA) 2022, McGill University, Montreal, CA.
- Graduate Excellence Award 2020, McGill University, Montreal, CA.
- Best Paper Award - RIACT 2020 Conference, Vellore, IN.
- Rubin Gruber SURE Award 2019, McGill University, Montreal, CA.
- Manipal Scholar Award-2016-17, Manipal University, IN.

TECHNICAL SKILLS

Languages: MATLAB, LABVIEW, Python, C/C++, HTML

Design: Catia, SOLIDWORKS, AutoCAD, Fusion 360, nTopology

Analysis: Ansys Mechanical APDL & Workbench, Adams

CAM: Fusion 360 Machining, MasterCAM; Cura, Prusa & FormLabs printers for 3D Printing
